Dear Customers,

Do you have a project that requires HVLS fans and do these fans need to be Buy American Act compliant? If yes, Hunter Industrial has you covered! Hunter Industrial's Titan, ECO and XP HVLS fans are Buy American Act compliant!

At Hunter Industrial, we take pride in the fact that our fans are Buy American Act compliant. This means that our fans meet the applicable standards for the Buy American Act passed by Congress in 1933. In fact, we maintain the highest quality standards by assembling and testing every fan here in our Nashville office before it's shipped to the customer.

If Buy American Act compliance is a requirement for your organization, rest assured that our fans are compliant and that our team will certify it along with related provisions. You can also feel confident that when a Hunter Industrial fan arrives at your door, there will be no issues. If you have any concerns or questions, our team stands ready to assist you.

A handwritten signature in black ink that reads "Mark J. D'Agostino". The signature is written in a cursive style.

Mark J D'Agostino
Senior Vice President & General Manager
