MaestroShield®
Protection Like No Other

MaestroShield® products are innovation at its best. Our latest garage screen products have been tested with MaestroShield motors & electronics to greatly enhance your screen, interior and other design applications. These are only some of the reasons why MaestroShield is superior to the competition in tubular motors and electronics.

Product Information

Garage & Entrance

BENEFITS

Exterior screening on your garage door enables you to extend usage of your garage by reducing heat, wind, rain and insects, while decreasing heat gain, which is responsible for up to 50% of the energy usage to cool homes.

FEATURES:

- (Zipper system and seams are RF or Pulse Welded (heat welded) for extreme support.
- The screen Entry Guide on the Side Rail aligns and stabilizes screening to perfection.
- The heavy duty zipper system and Bottom Bar reduce friction providing precision lifting and lower capacity.
- There is no need to re-tension screens after installation. The heavy duty Bottom Bar retains a taught screen.
- The Bottom Bar is weighted down with marine grade stainless steel bars to avoid corrosion.
- All corners are reinforced for added strength.
- The screen is splined directly to the Motor Tube to eliminate sagging.
- No screws are visible in the side rails or bottom bar providing a clean, elegant appearance.
- MaestroShield Tubular Motors and Electronics have been tested for their quality and strength and are supported by industry leading warranties.
- Controllers in handheld, keychain or wall-mount .
1, 4*, 6,* or 16 channel available). *(limited style)

NEED ADDED PEACE OF MIND?

For an added touch of safety you can include one of our rebound technologies. We offer a "sensory rubber seal" inserted along the bottom bar bottom, or a rebound functionality that is programmed within the tubular motor. Your choice. Or both!
